EHS TURBO® Plus Clearcoat

Outstanding finish and durability

NEXA AUTOCOLOR® brand is committed to offer new and innovative products that improve productivity and profitability, as well as outstanding colour quality. The P190-1280 EHS Turbo Plus Clearcoat is another example of this commitment.

Developed to be easy to use and to deliver flexibility over large and irregular surfaces, P190-1280 EHS Clearcoat is a great product for use over basecoat or direct gloss topcoats, where multistripes jobs are required.

This clearcoat delivers striking final appearance and durability, thanks to its easy application over large surfaces and with great vertical resistance, together with fast baking a reliable polishing.

P190-1280 will provide the perfect final touch: the best option for repairers looking for an easy-to-use clearcoat delivering an excellent finish and an eye-catching result for their commercial vehicles.

Features	Benefits
VOC less than 420 g/l.	Conforms to all European VOC directives.
Easy to use	Minimal Training Required
High solids	Material and Cost Saving
Outstanding application properties when used with HVLP or Low Pressure Compliant Sprayguns	Excellent appearance, gloss and flow direct from the gun
Excellent drying and hardness	Good polishing characteristics
Can be used over solventborne and waterborne basecoats	One clearcoat required for all finishes

For professional use only. Please refer to technical data sheet for details of the personal protection equipment required for products containing isocyanate.
